+2 (Higher Secondary): Technical Higher Secondary (IHRD), Kozhikode | 2016 - 2018

SHIKHIL RAJ PV - Selected Odoo, ERP & Integration Projects

Odoo SAP Integration

- Integrated Odoo 17 with SAP using REST APIs to automate sales order synchronization.
- Developed batch processing logic to group sales orders based on specific rules, handling product prices and discounts separately. Optimized the integration to support the processing of 100+ sales orders per day, reducing manual data transfer.

Technologies: *Odoo 17 | Python | REST API | SAP*

Telematics & Survey Checklist Workflow

- Developed custom survey checklist workflows, API integrations, and reporting features to support network communication business processes
- Implemented inspection management and post-survey action tracking workflows to streamline follow-up activities.
- Created custom reports to meet business requirements and improve survey data visibility.

Technologies: *Odoo 18 | Python | XML/QWeb | PostgreSQL*

Pagos Payment Integration

- Developed a custom payment workflow and REST API integration for automated payment processing.
- Implemented daily automatic payment reconciliation using data received from an external system.

Technologies: *Odoo | Python | XML/QWeb | PostgreSQL*

Client Outsourcing

- Implemented Odoo 19 on the client's server, configuring localization, the Chart of Accounts, taxes, journals, journal entries, products, and related master data.Configured ERP workflows across Sales, Purchase, Inventory, Accounting, and Manufacturing, and provided end-user training.
- Developed custom workflows and modules for equipment and partner management, including machinery, equipment, services, and field service tracking.
- Created custom PDF and Excel reports based on client requirements.Customized the POS to support multi-currency payments, facilitating the transition to Odoo 18 & 19.
- Customized core Sales, Inventory, and Purchase modules to meet business requirements.Provided technical support by debugging and resolving issues in existing custom modules and reports.

Technologies: *Odoo 17, 18, 19 | Python | XML/QWeb | PostgreSQL | OWL*

Data Migration & Customisation

- Migrated Greek ERP data to Odoo 17, ensuring a smooth transition to the new system.Developed custom scripts to import data from other ERP systems into Odoo and prepared data import templates. Provided the templates to the client and delivered training on the data import process.Customized the Odoo website to display dealer and shareholder information, including related customer, partner, and commission details.
- Integrated MyAADE with Odoo to streamline client operations and enable seamless data exchange between platforms.

Technologies: *Odoo 17 | Python | XML/QWeb | PostgreSQL*

Transportation Management

- Resolved issues in existing transportation workflows and developed custom inspection models and reports.
- Deployed a third-party digital-signature module on the client's server and integrated it with Odoo to support inspection and approval workflows.
- Implemented a daily backup script for the digital-signature module to support data protection and recovery.

Technologies: *Odoo 16 | Python | XML/QWeb | PostgreSQL | OWL*

Workshop Management

- Implemented Odoo 18 on the client's server, configured the Chart of Accounts and journals, and imported products and product categories.
- Developed a custom equipment management module to manage equipment, vehicles, and service operations, including garage and auto-fix workflows.

Technologies: *Odoo 18 | Python | XML/QWeb | PostgreSQL | OWL*
